Epidemiology

Epidemiological comments
Abnormal mortalities were observed in 5 poultry farms in Changhua County and Yunlin County. Samples were sent to the National Laboratory (Animal Health Research Institute [AHRI]) for diagnosis. H5N8 subtype HPAI was confirmed by AHRI. Among the 5 poultry farms, H5N2 subtype HPAI virus was also detected on one farm. These farms have been put under movement restrictions. All animals on the infected farms have been culled. Thorough cleaning and disinfection have been conducted after stamping out operation. Surrounding poultry farms within 3 km radius of infected farms are under intensified surveillance for 3 months.
Source of the outbreak(s) or origin of infection
• Unknown or inconclusive
