# Access to vaccines and immunoglobulins

Global Rabies Elimination – The Time is Now  
12 December 2015

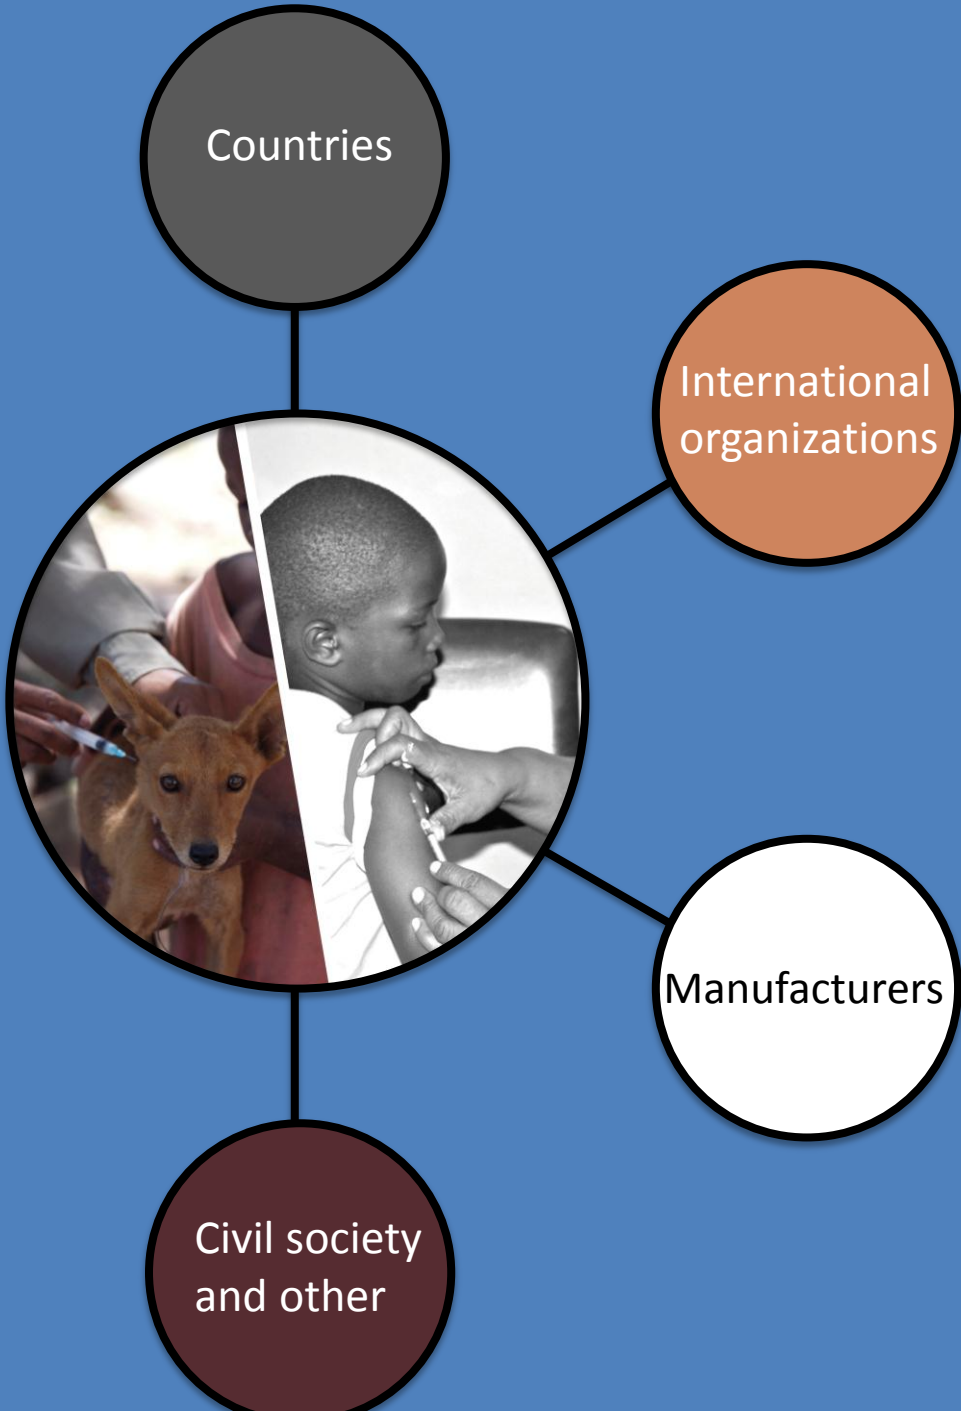

Dr Bernadette ABELA-RIDDER

Team Leader, Neglected Zoonotic Diseases & WHO Rabies FP

Department of the Control of Neglected Tropical Diseases

World Health Organization

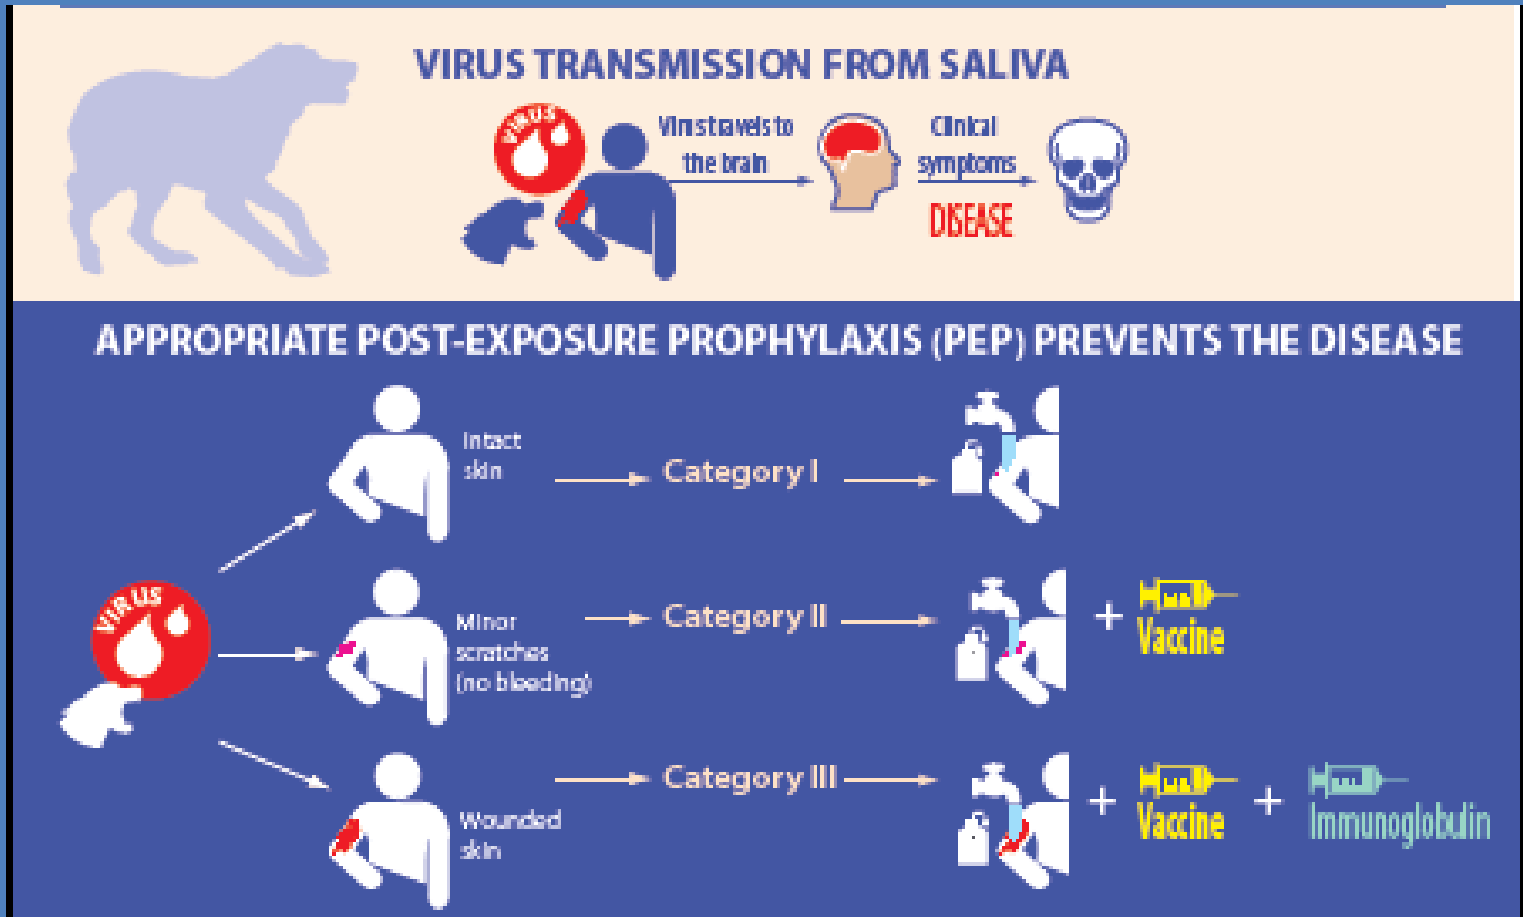

# Improving procurement systems for human and dog vaccines and rabies immunoglobulins

# Exploring options to increase equity and access

# Appropriate use

# Intradermal administration

G. Sampath

# What next?

- Improved procurement mechanism is needed
- Forecast to ensure more stable and consistent availability at optimal price
- Manufacturing capacity is driven by demand and Data
- Use a revolving fund as an appropriate mechanism to support countries
- Stimulus via vaccine should include support beyond the cost of the vaccines (e.g. for delivery, training, logistics).
- Stockpile small amounts of RIGs
