

PVS GAP ANALYSIS AND PVS FOLLOW-UP EVALUATIONS – THE PVS PATHWAY

Alain Dehove

Co-ordinator of the World Animal Health and Welfare Fund

The initial country PVS evaluation sets the baseline founded on democratically adopted OIE international standards on Quality of Veterinary Services.

A PVS Gap Analysis mission facilitates the definition of a country's Veterinary Services' objectives in terms of compliance with OIE quality standards, suitably adapted to national constraints and priorities.

The country PVS Gap Analysis report includes an indicative annual budget and one exceptional budget (for exceptional investments), when relevant, consolidated to propose an indicative 5-year Budget for the country's Veterinary Services.

In practice, this means:

- Defining, together with the Veterinary Services, and in accordance with national priorities and constraints, the expected result (i.e. level of advancement defined in the OIE PVS tool) at the end of the five-year period for the critical competencies of the OIE PVS tool which are relevant to the national context;
- Determining the activities to be carried out in order to achieve the expected results for the critical competencies of the OIE PVS Tool which are relevant to the national context of the relevant country;
- Determining, with the help of information, data or interviews, the tasks and human, physical and financial resources required to implement these activities to enable the Veterinary Services to function appropriately.

The country PVS Gap Analysis priority objectives focus primarily on the national context of the country and its priorities. How and what to finance is a sovereign decision of the country.

The country's Government decides if this is kept for internal use (government funding) or shared with Donors and relevant International Organisations to prepare investment programmes.

Periodic use of the PVS Tool (initial PVS evaluation and subsequent PVS follow-up evaluations) provides a way of measuring in absolute terms the progress that countries have made in sustainably improving their compliance with the OIE quality standards set out in the OIE *Terrestrial Animal*

Health Code (Terrestrial Code).

Regular country PVS Follow-up Evaluation missions (every [2 to 5] years) are useful to assess, monitor and accompany progress made (change in legislation, structure, impact of national and international investments, technical capacities improved, etc.).

Key words: OIE PVS Pathway – OIE PVS Gap Analysis – Budget for the country's Veterinary Services - PVS Follow-up evaluations.
