OIE Conference on Animal Identification and Traceability
Buenos Aires 23-25 March 2009

World Farmers' address
Animal Identification and Traceability

Farmers are the primary users and beneficiaries of the systems

Farmers' requirements and evaluative animal identification and traceability systems

Governments' role and responsibilities

Capacity building, research and development

International Federation of Agricultural Producers

FIPAF IFAP
• Animal identification and traceability systems: tools for farmers

• Farmers need simple, workable and not prescriptive systems

• IFAP supports OIE and Codex for internationally harmonized minimum standards

• Broad dialogue and partnership needed: farmers have to be involved in consultations

• Increased awareness-raising, capacity building, research and development
