

WORKING WITH COUNTRIES TO TACKLE INFECTIOUS ANIMAL DISEASE EMERGENCIES

The OIE provides a wide range of tools to help Member Countries manage emergencies in collaboration with partners

PREPARE

Operational readiness

Strengthening health services

- Competent veterinarians & Veterinary Services
- Policies, plans and legislation fit for purpose and in line with OIE standards
- Communication plans

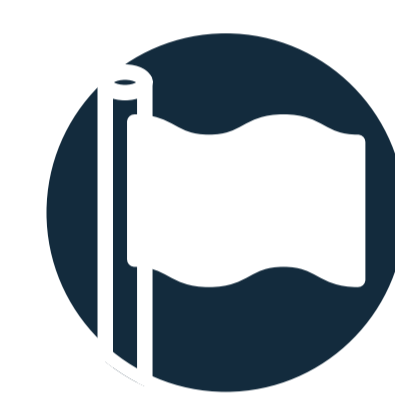

- Share national contingency plans
- Multi-sector simulation exercises
- Disseminate technical information
- Facilitate research to ensure the availability of the latest diagnostics and interventions

PREVENT

Risk reduction

Stop international spread of disease in its tracks

- Capacity building
 - Veterinary Services
 - Veterinary education
 - Laboratory expertise

- Functional One Health partnerships
- Disease prevention awareness
- Share information and biological materials

Oie TOOLBOX for Member Countries

- Capacity building
PVS Pathway - Veterinary Legislation and Twinning programmes - OIE Reference Centre Network - Trainings
- International standards and guidance
on animal health & welfare
- Transparency on animal health situation, including zoonoses
World Animal Health Information System (WAHIS) - Global Early Warning System (GLEWS) - Communications

RESPOND

Integrated response

Act within a strong One Health framework

- Real-time official information on disease spread
- Strong Veterinary Services
- Risk communication

- Technical support
- Scientific opinion & risk assessment on the disease situation
- Rapid response missions
- Share biological materials and data for effective interventions

DETECT

Effective surveillance & transparency

Early detection and immediate reporting through WAHIS

- Strong surveillance systems
- Accurate diagnostic tests

- Disease rumour tracking
- Epidemiological investigation

SUSTAIN STRONG NETWORKS

Within the OIE With partners

- 181 national Delegates
- 1,800 national Focal Points
- 322 reference Centres
- Experts working groups

- More than 70 partnership agreements with international and regional organisations in the sectors of health (WHO, FAO), security, law enforcement, disaster management, climate
- Pandemic prevention networks – OFFLU
- Research coordination – STAR-IDAZ
