# **OIE Reference Laboratory Reports Activities**Activities in 2021

This report has been submitted: 2022-01-19 17:36:52

Name of disease (or topic) for which you are a designated OIE Reference Laboratory:	Ovine epididymitis (Brucella ovis)
Address of laboratory:	Via Campo Boario 64100 Teramo ITALY
Tel.:	+390861332626
Fax:	+390861332251
E-mail address:	f.demassis@izs.it
Website:	www.izs.it
Name (including Title) of Head of Laboratory (Responsible Official):	Dr Nicola D'Alterio, DVM, Director General
Name (including Title and Position) of OIE Reference Expert:	Fabrizio De Massis
Which of the following defines your laboratory? Check all that apply:	Governmental

### ToR 1: To use, promote and disseminate diagnostic methods validated according to OIE Standards

1. Did your laboratory perform diagnostic tests for the specified disease/topic for purposes such as disease diagnosis, screening of animals for export, surveillance, etc.? (Not for quality control, proficiency testing or staff training)

Yes

Diagnostic Test	Indicated in OIE Manual (Yes/No)	Total number of test performed last year	
Indirect diagnostic tests		Nationally	Internationally
B. ovis CFT	Yes	13	0
B. ovis I-ELISA	Yes	0	0
Direct diagnostic tests		Nationally	Internationally
Primary Culture	Yes	0	0
Identification	Yes	0	0
PCR	Yes	0	0

ToR 2: To develop reference material in accordance with OIE requirements, and implement and promote the application of OIE Standards.

To store and distribute to national laboratories biological reference products and any other reagents used in the diagnosis and control of the designated pathogens or disease.

2. Did your laboratory produce or supply imported standard reference reagents officially recognised by the OIE?

No

3. Did your laboratory supply standard reference reagents (non OIE-approved) and/or other diagnostic reagents to OIE Member Countries?

Yes

Type of reagent available	Related diagnostic test	Produced/ provide	Amount supplied nationally (ml, mg)	Amount supplied internationally (ml, mg)	No. of recipient OIE Member Countries	Region of recipients
B. ovis antigen (CFT)	CFT	Produced and provided (0 ml)	170	0	0	□Africa □Americas □Asia and Pacific □Europe □Middle East
B. ovis negative control serum (CFT)	B. ovis CFT	Produced and provided (0 ml)	0	0	0	□Africa □Americas □Asia and Pacific □Europe □Middle East
B. ovis positive control serum (CFT)	B. ovis CFT	Produced and provided (0 ml)	17	0	0	□Africa □Americas □Asia and Pacific □Europe □Middle East
Brucella ovis Strains	CFT and ELISA antigen production	Produced and provided (0 ml)	0	0	0	□Africa □Americas □Asia and Pacific □Europe □Middle East

4. Did your laboratory produce vaccines?

No

5. Did your laboratory supply vaccines to OIE Member Countries?

No

# ToR 3: To develop, standardise and validate, according to OIE Standards, new procedures for diagnosis and control of the designated pathogens or diseases

6. Did your laboratory develop new diagnostic methods validated according to OIE Standards for the designated pathogen or disease?

No

TOR 4: To provide diagnostic testing facilities, and, where appropriate, scientific and technical advice on disease control measures to OIE Member Countries  8. Did your laboratory carry out diagnostic testing for other OIE Member Countries?  No  9. Did your laboratory provide expert advice in technical consultancies on the request of an OIE Member Country?  No  TOR 5: To carry out and/or coordinate scientific and technical studies in collaboration with other laboratories, centres or organisations  10. Did your laboratory participate in international scientific studies in collaboration with OIE Member Countries other than the own?  No  TOR 6: To collect, process, analyse, publish and disseminate epizootiological data relevant to the designated pathogens or diseases  11. Did your Laboratory collect epizootiological data relevant to international disease control?  No  If the answer is no, please provide a brief explanation of the situation:  B. ovis infection is not a notifiable disease in most countries, Italy included.  12. Did your laboratory disseminate epizootiological data that had been processed and analysed?  No  If the answer is no, please provide a brief explanation of the situation:  See above.	7. Did your laboratory develop new vaccines according to OIE Standards for the designated pathogen or disease?
8. Did your laboratory carry out diagnostic testing for other OIE Member Countries?  No  9. Did your laboratory provide expert advice in technical consultancies on the request of an OIE Member Country?  No  TOR 5: To carry out and/or coordinate scientific and technical studies in collaboration with other laboratories, centres or organisations  10. Did your laboratory participate in international scientific studies in collaboration with OIE Member Countries other than the own?  No  TOR 6: To collect, process, analyse, publish and disseminate epizootiological data relevant to the designated pathogens or diseases  11. Did your Laboratory collect epizootiological data relevant to international disease control?  No  If the answer is no, please provide a brief explanation of the situation:  B. ovis infection is not a notifiable disease in most countries, Italy included.  12. Did your laboratory disseminate epizootiological data that had been processed and analysed?  No  If the answer is no, please provide a brief explanation of the situation:	No
8. Did your laboratory carry out diagnostic testing for other OIE Member Countries?  No  9. Did your laboratory provide expert advice in technical consultancies on the request of an OIE Member Country?  No  TOR 5: To carry out and/or coordinate scientific and technical studies in collaboration with other laboratories, centres or organisations  10. Did your laboratory participate in international scientific studies in collaboration with OIE Member Countries other than the own?  No  TOR 6: To collect, process, analyse, publish and disseminate epizootiological data relevant to the designated pathogens or diseases  11. Did your Laboratory collect epizootiological data relevant to international disease control?  No  If the answer is no, please provide a brief explanation of the situation:  B. ovis infection is not a notifiable disease in most countries, Italy included.  12. Did your laboratory disseminate epizootiological data that had been processed and analysed?  No  If the answer is no, please provide a brief explanation of the situation:	
8. Did your laboratory carry out diagnostic testing for other OIE Member Countries?  No  9. Did your laboratory provide expert advice in technical consultancies on the request of an OIE Member Country?  No  TOR 5: To carry out and/or coordinate scientific and technical studies in collaboration with other laboratories, centres or organisations  10. Did your laboratory participate in international scientific studies in collaboration with OIE Member Countries other than the own?  No  TOR 6: To collect, process, analyse, publish and disseminate epizootiological data relevant to the designated pathogens or diseases  11. Did your Laboratory collect epizootiological data relevant to international disease control?  No  If the answer is no, please provide a brief explanation of the situation:  B. ovis infection is not a notifiable disease in most countries, Italy included.  12. Did your laboratory disseminate epizootiological data that had been processed and analysed?  No  If the answer is no, please provide a brief explanation of the situation:	
9. Did your laboratory provide expert advice in technical consultancies on the request of an OIE Member Country?  No  TOR 5: To carry out and/or coordinate scientific and technical studies in collaboration with other laboratories, centres or organisations  10. Did your laboratory participate in international scientific studies in collaboration with OIE Member Countries other than the own?  No  TOR 6: To collect, process, analyse, publish and disseminate epizootiological data relevant to the designated pathogens or diseases  11. Did your Laboratory collect epizootiological data relevant to international disease control?  No  If the answer is no, please provide a brief explanation of the situation:  B. ovis infection is not a notifiable disease in most countries, Italy included.  12. Did your laboratory disseminate epizootiological data that had been processed and analysed?  No  If the answer is no, please provide a brief explanation of the situation:	
9. Did your laboratory provide expert advice in technical consultancies on the request of an OIE Member Country?  No  TOR 5: To carry out and/or coordinate scientific and technical studies in collaboration with other laboratories, centres or organisations  10. Did your laboratory participate in international scientific studies in collaboration with OIE Member Countries other than the own?  No  TOR 6: To collect, process, analyse, publish and disseminate epizootiological data relevant to the designated pathogens or diseases  11. Did your Laboratory collect epizootiological data relevant to international disease control?  No  If the answer is no, please provide a brief explanation of the situation:  B. ovis infection is not a notifiable disease in most countries, Italy included.  12. Did your laboratory disseminate epizootiological data that had been processed and analysed?  No  If the answer is no, please provide a brief explanation of the situation:	8. Did your laboratory carry out diagnostic testing for other OIE Member Countries?
Tor 5: To carry out and/or coordinate scientific and technical studies in collaboration with other laboratories, centres or organisations  10. Did your laboratory participate in international scientific studies in collaboration with OIE Member Countries other than the own?  No  Tor 6: To collect, process, analyse, publish and disseminate epizootiological data relevant to the designated pathogens or diseases  11. Did your Laboratory collect epizootiological data relevant to international disease control?  No  If the answer is no, please provide a brief explanation of the situation:  B. ovis infection is not a notifiable disease in most countries, Italy included.  12. Did your laboratory disseminate epizootiological data that had been processed and analysed?  No  If the answer is no, please provide a brief explanation of the situation:	No
Tor 5: To carry out and/or coordinate scientific and technical studies in collaboration with other laboratories, centres or organisations  10. Did your laboratory participate in international scientific studies in collaboration with OIE Member Countries other than the own?  No  Tor 6: To collect, process, analyse, publish and disseminate epizootiological data relevant to the designated pathogens or diseases  11. Did your Laboratory collect epizootiological data relevant to international disease control?  No  If the answer is no, please provide a brief explanation of the situation:  B. ovis infection is not a notifiable disease in most countries, Italy included.  12. Did your laboratory disseminate epizootiological data that had been processed and analysed?  No  If the answer is no, please provide a brief explanation of the situation:	
TOR 5: To carry out and/or coordinate scientific and technical studies in collaboration with other laboratories, centres or organisations  10. Did your laboratory participate in international scientific studies in collaboration with OIE Member Countries other than the own?  No  TOR 6: To collect, process, analyse, publish and disseminate epizootiological data relevant to the designated pathogens or diseases  11. Did your Laboratory collect epizootiological data relevant to international disease control?  No  If the answer is no, please provide a brief explanation of the situation:  B. ovis infection is not a notifiable disease in most countries, Italy included.  12. Did your laboratory disseminate epizootiological data that had been processed and analysed?  No  If the answer is no, please provide a brief explanation of the situation:	
20. Did your laboratory participate in international scientific studies in collaboration with OIE Member Countries other than the own?  No  ToR 6: To collect, process, analyse, publish and disseminate epizootiological data relevant to the designated pathogens or diseases  11. Did your Laboratory collect epizootiological data relevant to international disease control?  No  If the answer is no, please provide a brief explanation of the situation:  B. ovis infection is not a notifiable disease in most countries, Italy included.  12. Did your laboratory disseminate epizootiological data that had been processed and analysed?  No  If the answer is no, please provide a brief explanation of the situation:	No
20. Did your laboratory participate in international scientific studies in collaboration with OIE Member Countries other than the own?  No  ToR 6: To collect, process, analyse, publish and disseminate epizootiological data relevant to the designated pathogens or diseases  11. Did your Laboratory collect epizootiological data relevant to international disease control?  No  If the answer is no, please provide a brief explanation of the situation:  B. ovis infection is not a notifiable disease in most countries, Italy included.  12. Did your laboratory disseminate epizootiological data that had been processed and analysed?  No  If the answer is no, please provide a brief explanation of the situation:	
ToR 6: To collect, process, analyse, publish and disseminate epizootiological data relevant to the designated pathogens or diseases  11. Did your Laboratory collect epizootiological data relevant to international disease control?  No  If the answer is no, please provide a brief explanation of the situation:  B. ovis infection is not a notifiable disease in most countries, Italy included.  12. Did your laboratory disseminate epizootiological data that had been processed and analysed?  No  If the answer is no, please provide a brief explanation of the situation:	
ToR 6: To collect, process, analyse, publish and disseminate epizootiological data relevant to the designated pathogens or diseases  11. Did your Laboratory collect epizootiological data relevant to international disease control?  No  If the answer is no, please provide a brief explanation of the situation:  B. ovis infection is not a notifiable disease in most countries, Italy included.  12. Did your laboratory disseminate epizootiological data that had been processed and analysed?  No  If the answer is no, please provide a brief explanation of the situation:	
11. Did your Laboratory collect epizootiological data relevant to international disease control?  No  If the answer is no, please provide a brief explanation of the situation:  B. ovis infection is not a notifiable disease in most countries, Italy included.  12. Did your laboratory disseminate epizootiological data that had been processed and analysed?  No  If the answer is no, please provide a brief explanation of the situation:	No
11. Did your Laboratory collect epizootiological data relevant to international disease control?  No  If the answer is no, please provide a brief explanation of the situation:  B. ovis infection is not a notifiable disease in most countries, Italy included.  12. Did your laboratory disseminate epizootiological data that had been processed and analysed?  No  If the answer is no, please provide a brief explanation of the situation:	
11. Did your Laboratory collect epizootiological data relevant to international disease control?  No  If the answer is no, please provide a brief explanation of the situation:  B. ovis infection is not a notifiable disease in most countries, Italy included.  12. Did your laboratory disseminate epizootiological data that had been processed and analysed?  No  If the answer is no, please provide a brief explanation of the situation:	
If the answer is no, please provide a brief explanation of the situation:  B. ovis infection is not a notifiable disease in most countries, Italy included.  12. Did your laboratory disseminate epizootiological data that had been processed and analysed?  No  If the answer is no, please provide a brief explanation of the situation:	
If the answer is no, please provide a brief explanation of the situation:  B. ovis infection is not a notifiable disease in most countries, Italy included.  12. Did your laboratory disseminate epizootiological data that had been processed and analysed?  No  If the answer is no, please provide a brief explanation of the situation:	11. Did your Laboratory collect epizootiological data relevant to international disease control?
B. ovis infection is not a notifiable disease in most countries, Italy included.  12. Did your laboratory disseminate epizootiological data that had been processed and analysed?  No  If the answer is no, please provide a brief explanation of the situation:	No
B. ovis infection is not a notifiable disease in most countries, Italy included.  12. Did your laboratory disseminate epizootiological data that had been processed and analysed?  No  If the answer is no, please provide a brief explanation of the situation:	
12. Did your laboratory disseminate epizootiological data that had been processed and analysed?  No  If the answer is no, please provide a brief explanation of the situation:	If the answer is no, please provide a brief explanation of the situation:
No  If the answer is no, please provide a brief explanation of the situation:	B. ovis infection is not a notifiable disease in most countries, Italy included.
No  If the answer is no, please provide a brief explanation of the situation:	
If the answer is no, please provide a brief explanation of the situation:	12. Did your laboratory disseminate epizootiological data that had been processed and analysed?
	No
See above.	If the answer is no, please provide a brief explanation of the situation:
l I	See above.

### 13. What method of dissemination of information is most often used by your laboratory? (Indicate in the appropriate box the number by category)

a) Articles published in peer-reviewed journals: 1

Galluzzo, P.; Migliore, S.; Cascio, S.; Barreca, S.; Alfano, M.; Tagliarini, A.; Candela, A.; Piraino, C.; Galuppo, L.; Condorelli, L.; Hussein, H.A.; Tittarelli, M.; Chiarenza, G. Diagnostic Findings in a Confirmed Outbreak of Brucella ovis Infection in a Traditional Sheep Farm in Sicily (South-Italy). Pathogens 2021, 10, 1472. https://doi.org/10.3390/pathogens10111472

b) International conferences: 0

#### c) National conferences: 1

On the 25th of October 2021 IZSAM organized "A study day on Brucellosis" a national conference focused on reporting the current situation of Brucellosis in Italy, on ongoing and completed research activities with the aim of sharing knowledge for a continuous process of development and innovation. The topics included epidemiology, genomics, proteomics and vaccines related to brucellosis, covering from domestic animals to wildlife and marine mammals. The conference was also an occasion to present the results of national interlaboratory ring trials organized in 2018/2019.

d) Other:

(Provide website address or link to appropriate information) 0 WWW.IZS.it

### ToR 7: To provide scientific and technical training for personnel from OIE Member Countries

To recommend the prescribed and alternative tests or vaccines as OIE Standards

14. Did your laboratory provide scientific and technical training to laboratory personnel from other OIE Member Countries?

No

## ToR 8: To maintain a system of quality assurance, biosafety and biosecurity relevant for the pathogen and the disease concerned

15. Does your laboratory have a Quality Management System?

Yes

Quality management system adopted	Certificate scan (PDF, JPG, PNG format)
ISO 17025	Certificato Accredia ISO17025_202001.pdf

16. Is your quality management system accredited?

Yes

Test for which your laboratory is accredited	Accreditation body
Complement Fixation test (CFT) for B. ovis	ACCREDIA (member of EA, IAF and ILAC)
Brucella spp. Isolation	ACCREDIA (member of EA, IAF and ILAC)

17. Does your laboratory maintain a "biorisk management system" for the pathogen and the disease concerned?

Yes

(See Manual of Diagnostic Tests and Vaccines for Terrestrial Animals, Chapter 1.1.4)

#### ToR 9: To organise and participate in scientific meetings on behalf of the OIE

18. Did your laboratory organise scientific meetings on behalf of the OIE?

No

19. Did your laboratory participate in scientific meetings on behalf of the OIE?

No

ToR 10: To establish and maintain a network with other OIE Reference Laboratories designated for the same pathogen or disease and organise regular inter-laboratory proficiency testing to ensure comparability of results

20. Did your laboratory exchange information with other OIE Reference Laboratories designated for the same pathogen or disease?

Yes

21. Was your laboratory involved in maintaining a network with OIE Reference Laboratories designated for the same pathogen or disease by organising or participating in proficiency tests?

No

22. Did your laboratory collaborate with other OIE Reference Laboratories for the same disease on scientific research projects for the diagnosis or control of the pathogen of interest?

No

### ToR 11: To organise inter-laboratory proficiency testing with laboratories other than OIE Reference Laboratories for the same pathogens and diseases to ensure equivalence of results

23. Did your laboratory organise or participate in inter-laboratory proficiency tests with laboratories other than OIE Reference Laboratories for the same disease?

No

Note: See Interlaboratory test comparisons in: Laboratory Proficiency Testing at: <a href="http://www.oie.int/en/our-scientific-expertise/reference-laboratories/proficiency-testing">http://www.oie.int/en/our-scientific-expertise/reference-laboratories/proficiency-testing</a> see point 1.3

#### ToR 12: To place expert consultants at the disposal of the OIE

24. Did your laboratory place expert consultants at the disposal of the OIE?

No

25. Additional comments regarding your report:

Actually, the personal of the State Veterinary sdcviced was wery neen and and listening to what we wwere saying
