**Our 4 pillars of action in 2015**

Following on from 2014, a year which marked the 95th anniversary of the formation of the World Organisation for Animal Health (OIE), numerous events have punctuated its activities, around 4 pillars:

1. **Improve veterinary public health**
2. **Contribute to protecting human health**
3. **Support social and economic development of populations**
4. **Fighting zoonoses.**

**Our goals for the future**

- Improve veterinary public health
- Contribute to protecting human health
- Support social and economic development of populations
- Fighting zoonoses.

To that aim, in 2015, the World Assembly of OIE Delegates adopted the 6th Strategic Plan, bringing important evolutions in the functioning of the OIE, and selected the 5 key actors of the Organisation.

**6th Strategic Plan**

Promoting excellence, transparency, communication and solidarity as the cornerstones of modern animal health governance.

**New governing bodies**

Appointed by the World Assembly of Delegates to represent them, these key actors support the various administrative, scientific and standard-setting activities, to ensure excellence and relevance in all action undertaken by the OIE.

**A global network of more than 3,000 people**

180 Member Countries
1 Headquarters (Paris, France)
13 Regional and Sub-Regional Representations
71 Partner Organisations
301 Reference Centres

**Focus on several regional actions**

Thirteen Regional and Sub-Regional Representations and Offices contribute to the efforts of the OIE to develop a global network of animal health systems and centres of expertise capable of combating emerging and re-emerging diseases, particularly zoonoses.

**Distribution of activities financed by the OIE World Animal Health and Welfare Fund**

The OIE supports its Member Countries, and assists them to strengthen and structure their national animal health systems more effectively in accordance with its international standards. In addition to the general budget, which is comprised of mandatory contributions from Member Countries, the OIE World Fund enables multiple donors to support programmes implemented by the Organisation.

**Regional progress with the PVS Pathway**

A voluntary process, conducted at the request of national authorities, the PVS Pathway contributes to the sustainable consolidation of national animal health systems, through gradual implementation of various intervention stages.
Meeting the health challenges of tomorrow

Our 4 pillars of action in 2015

Following on from 2014, a year which marked the 90th anniversary of the formation of the World Organisation for Animal Health (OIE), numerous events have punctuated its activities, around 4 pillars:

- Improve veterinary public health
- Contribute to protecting human health
- Support social and economic development of populations
- Re-emerging zoonoses.

Our goals for the future

To that aim, in 2015, the World Assembly of Delegates adopted the 6th Strategic Plan, bringing important evolutions in the functioning of the OIE, and selected as the governing bodies of the Organisation.

We will make sure that we build on our past achievements to meet the health challenges of tomorrow.

6th Strategic Plan

Promoting excellence, transparency, communication and solidarity as the cornerstones of modern animal health governance.

New governing bodies

Appointed by the World Assembly of Delegates to represent them, these key actors support the various administrative, scientific and standard-setting activities, to ensure excellence and relevance in all action undertaken by the OIE.
