Epidemiology

Epidemiological comments
Diagnosis: the reasons for suspicion were clinical signs, the presence of Danube Delta territory around the affected village, and the presence of migratory birds around the outbreak area.

Control measures undertaken:

- affected village placed under official control;
- stamping out applied to all birds within the affected village (culling of poultry by gassing with CO2 in containers; destruction of corpses by burning and burying);
- quarantine (all movement of people, poultry, poultry products, feed, etc., is prohibited; restriction measures are being applied to the entire affected village);
- disinfection of backyard premises and roads in the affected village.

Source of Infection	• Contact with wild Species
----------------------------	-----------------------------

Control Measures

Applied	• Movement control inside the country • Disinfection of infected premises/establishment(s) • Quarantine • Stamping out	To be applied	• No Planned Control Measures
		Vaccination Prohibited	No
