Birds	37506	2471	2471	35035	0

Epidemiology

Epidemiological comments
Affected poultry are kept traditionally with scavenging, low or no biosecurity. It can be assumed that the occurrence was related in some way with Keng Tung HPAI outbreak occurred last month. The infection was probably transmitted through flying birds or transport.
Source of Infection
• Unknown or inconclusive

Control Measures

Applied	<ul style="list-style-type: none"> • Stamping out • Quarantine • Movement control inside the country • Disinfection of infected premises/establishment(s) • Dipping / Spraying 	To be applied	<ul style="list-style-type: none"> • Control of wildlife reservoirs • Zoning
	Animals treated	No	Vaccination Prohibited

Country / Zone

Country or zone	a zone or compartment
------------------------	-----------------------

Diagnostic test results

Laboratory Type	Name of Laboratory	Species	Test Type	Date Results Provided	Result
Local laboratory	Keng Tung Diagnostic Laboratory	Birds	rapid tests	24/12/2007	Positive
National laboratory	Veterinary Diagnostic Laboratory, Yangon	Birds	polymerase chain reaction (PCR)	27/12/2007	Positive
National laboratory	Veterinary Diagnostic Laboratory, Yangon	Birds	rapid tests	26/12/2007	Positive

Future Reporting

What further reports will be submitted in relation to this event?
There are 3 outbreaks that are still recorded as unresolved. It is not possible to declare this event resolved until these individual outbreaks are resolved.
