

Follow-up report No.5

Report reference: , Reference OIE : 22321, Report Date : 03/02/2017, Country : Denmark

Report Summary

Name of sender of the report	Dr Per Starcke Henriksen	Telephone	+45 72 27 69 00
Position	Chief Veterinary Officer	Fax	
Address	Stationsparken 31-33 Glostrup DK-2600	Email	pesh@fvst.dk
		Date submitted to OIE	03/02/2017

Animal type	Terrestrial	Date of report	03/02/2017
Disease	Highly pathogenic avian influenza	Date of start of the event	08/11/2016
Causal Agent	Highly pathogenic avian influenza virus	Date of confirmation of the event	10/11/2016
Serotype(s)	H5N8	Date of last occurrence	2006
Reason	Reoccurrence of a listed disease	Diagnosis	Laboratory (advanced)
Country or zone	the whole country	Clinical signs	Yes
Number of reported outbreaks	submitted= 36, Draft= 0		

Outbreak details

Regional Veterinary and Food Administration	Number of outbreaks	Municipality		Unit Type	Location	Latitude	Longitude	Start Date	End Date:
EAST-other report - submitted	-	Copenhagen		Not applicable	Christinia	55.6748	12.6078	08/11/2016	10/11/2016
Species	Measuring units	Susceptible	Cases	Deaths	Destroyed	Slaughtered			
Tufted Duck: Anatidae (Aythya fuligula)	Animals	...	1	1	0	0			
Affected Population	On November 8th, a single dead tufted duck found in a moat in the central Copenhagen near the area Christiania.								

Regional Veterinary and Food Administration	Number of outbreaks	Municipality		Unit Type	Location	Latitude	Longitude	Start Date	End Date:
EAST-other report - submitted	-	Vordingborg		Not applicable	Stege	54.9812	12.2616	09/11/2016	11/11/2016

Whooper Swan		1	0	1	0
Common Raven		1	1	0	0
Northern Goshawk		1	1	0	0

Epidemiology

Epidemiological comments

Only one outbreak in this event has occurred in poultry. The affected holding was a hobby backyard holding reported in follow-up report no 2.

On December 22th, the 10 km surveillance zone was lifted, which was the last restriction zone out of the two restriction zones implemented due to the outbreak of HPAI Influenza in a backyard poultry flock in Ålsgårde. The 3 km protection zone was lifted on 13 December 2016.

In compliance with the letter of 26 December 2016 from the Director General, cases of HPAI in wild birds detected since 1 January 2017 are notified in a separate event using the new disease name "Highly pathogenic influenza A viruses (infection with) (non-poultry including wild birds)".

Denmark expects to regain its status as a country free from avian influenza according to the requirements of article 10.4.3 of the Terrestrial Animal Health Code on 22 February 2017.

Source of the outbreak(s) or origin of infection

- Contact with wild species

Measures applied

Applied	To be applied
<ul style="list-style-type: none"> • movement control inside the country • disinfection / disinfestation • traceability • stamping out • official disposal of carcasses, by-products and waste • surveillance within containment and/or protection zone • zoning 	<ul style="list-style-type: none"> • no planned control measures
Animals treated	Vaccination Prohibited
No	Yes

Future Reporting

The event is continuing. Weekly follow-up reports will be submitted.
