Epidemiology

Epidemiological comments

The outbreaks of highly pathogenic avian influenza in this event were reported on January 3rd, 2017. According to Ukrainian legislation the quarantines were lifted on February 7th in Odessa region and on March 17th in Chernovtsy region, but the stamping out and all disinfection measures have been finalized on January 5th. No clinical signs and further outbreaks of highly pathogenic avian influenza have been registered in this event since January 3rd. Taking into account that since the stamping out and disinfection have been conducted more than 3 months have passed, in accordance with Article 10.4.3 of the Terrestrial Animal Code, all the regions of Ukraine are now free from highly pathogenic avian influenza.

Source of the outbreak(s) or origin of infection

• Unknown or inconclusive
