Follow-up report No.2

Report Summary
Name of sender of the report: Mr Torben Grubbe
Telephone: (+45) 7227 6539
Address: Stationsparken 31-33 Glostrup DK-2600
Fax: Email: tgr@fvst.dk
Date submitted to OIE: 12/03/2019

Animal type: Terrestrial
Date of report: 12/03/2019
Disease: Highly pathogenic influenza A viruses (infection with) (non-poultry including wild birds)
Date of start of the event: 22/12/2018
Causal Agent: Highly pathogenic influenza A virus
Date of confirmation of the event: 14/01/2019
Serotype(s): H5N6
Date of last occurrence: 19/09/2018
Reason: Recurrence of a listed disease
Country or zone: the whole country
Clinical signs: Yes

Number of outbreaks:

Species | Measuring units | Susceptible | Cases | Deaths | Killed and disposed of | Slaughtered |
---------|-----------------|-------------|-------|--------|------------------------|-------------|
White-tailed Eagle | Accipitridae (Haliaeetus albicilla) | Animals | 1 | 1 | 0 | 0 |
Eurasian buzzard (common buzzard) | Accipitridae (Buteo buteo) | Animals | 1 | 1 | 0 | 0 |

Affected Population:
On December 22th, a white-tailed eagle (Haliaeetus albicilla) was found dead near Næstved. On January 14th, the National Veterinary Institute confirmed highly pathogenic avian influenza virus (H5N6) in the samples from the eagle.

Regional Veterinary and Food Administration:
Municipality: Næstved
Unit Type: Not applicable
Location: Næstved
Latitude: 55.2316
Longitude: 11.8316
Start Date: 22/12/2018
End Date: 22/12/2018

Species: White-tailed Eagle

Regional Veterinary and Food Administration:
Municipality: Odsherred
Unit Type: Not applicable
Location: Rørvig
Latitude: 55.9588
Longitude: 11.7773
Start Date: 04/01/2019
End Date: 04/01/2019

Species: Eurasian buzzard (common buzzard)

Outbreak summary: Total outbreaks = 2 (Submitted)

Species | Susceptible | Cases | Deaths | Killed and disposed of | Slaughtered |
---------|-------------|-------|--------|------------------------|-------------|
White-tailed Eagle | 0 | 0 | 0 |
Eurasian buzzard (common buzzard) | 1 | 1 | 0 |

Epidemiology
Epidemiological comments:
According to article 10.4.1.8 of the Terrestrial Animal Health Code, Member Countries should not impose bans on the trade in poultry and poultry commodities in response to notification on the presence of any influenza A virus in birds other than poultry.
No additional cases of infection with highly pathogenic influenza A viruses has been detected since it was detected in the common buzzard found dead in Rørvig on 4 January 2019.

Source of the outbreak(s) or origin of infection:
• Contact with wild species
