

Do you have any rinderpest virus-containing material (RVCM)?

YES

NO

This document is not for you

Is your institute a FAO-OIE approved Rinderpest Holding Facility (RHF)?

NO

YES

Do you wish to preserve your RVCM?

NO

YES

Accept* any RVCM being shipped to you (See **Receiving**)

Do you have the expertise and material to safely destroy any RVCM?

YES

NO

Ship to the appropriate RHF for storage (See **Shipping**)

Send annual reports on any RVCM held

If appropriate, destroy* the RVCM (See **Destruction**)

Destroy the RVCM and inform the OIE and FAO (See **Destruction**)

Ship to the appropriate RHF for storage (See **Shipping**)

If your RHF has been doing this already, please continue to do so.

*After having informed the OIE and the FAO

After removal of all RVCM, decontaminate all in-contact material and inform OIE and FAO

Do you have a lethal weapon in your freezer?

Rinderpest virus-containing material or RVCM not only includes live and vaccine strains of the rinderpest virus but also tissues, sera and other clinical material from infected or suspect animals as well as diagnostic material containing or encoding live virus.

Produced with support from the WMD Threat Reduction Program, Global Affairs Canada, and partners.
