

# OIE Reference Laboratory Reports Activities

## *Activities in 2020*

**This report has been submitted : 2021-01-24 17:51:50**

<b>Name of disease (or topic) for which you are a designated OIE Reference Laboratory:</b>	Highly and low pathogenic avian influenza
<b>Address of laboratory:</b>	USDA, APHIS, Veterinary Services 1920 Dayton Ave. Ames, Iowa 50010 UNITED STATES OF AMERICA
<b>Tel.:</b>	+1-515 337 75 51
<b>Fax:</b>	+1-515 337 65 08
<b>E-mail address:</b>	NVSL.DVL.Heads@usda.gov
<b>Website:</b>	<a href="http://www.aphis.usda.gov/nvsl">www.aphis.usda.gov/nvsl</a>
<b>Name (including Title) of Head of Laboratory (Responsible Official):</b>	Dr. Suelee Robbe-Austerman, Director, National Veterinary Services Laboratories, DB, VS, APHIS, USDA
<b>Name (including Title and Position) of OIE Reference Expert:</b>	Dr. Mia Torchetti, Director, Diagnostic Virology Laboratory, National Veterinary Services Laboratories, DB, VS, APHIS, USDA
<b>Which of the following defines your laboratory? Check all that apply:</b>	Governmental

**ToR 1: To use, promote and disseminate diagnostic methods validated according to OIE Standards**

1. Did your laboratory perform diagnostic tests for the specified disease/topic for purposes such as disease diagnosis, screening of animals for export, surveillance, etc.? (Not for quality control, proficiency testing or staff training)

Yes

Diagnostic Test	Indicated in OIE Manual (Yes/No)	Total number of test performed last year	
		Nationally	Internationally
Indirect diagnostic tests		Nationally	Internationally
Agar gel immunodiffusion	yes	132	0
Hemagglutination-inhibition (HI) antibody subtype identification (H1-16)	yes	11,707	0
Neuraminidase-inhibition (NI) antibody subtype identification (N1-9)	yes	3,042	0
Direct diagnostic tests		Nationally	Internationally
Real-time RT-PCR (IAV, subtyping)	yes	5,792	0
Virus Isolation (positive/total samples)	yes	501/4017	0
Molecular pathotype (Sanger)	yes	402	0
In vivo pathotype (IVPI)	yes	26	0
Whole genome sequencing	yes	460	3

**ToR 2: To develop reference material in accordance with OIE requirements, and implement and promote the application of OIE Standards. To store and distribute to national laboratories biological reference products and any other reagents used in the diagnosis and control of the designated pathogens or disease.**

2. Did your laboratory produce or supply imported standard reference reagents officially recognised by the OIE?

No

3. Did your laboratory supply standard reference reagents (non OIE-approved) and/or other diagnostic reagents to OIE Member Countries?

Yes

Type of reagent available	Related diagnostic test	Produced/ provide	Amount supplied nationally (ml, mg)	Amount supplied internationally (ml, mg)	No. of recipient OIE Member Countries	Region of recipients
Reference antigen	HI H1-H16	both	26	20	2	<input type="checkbox"/> Africa <input checked="" type="checkbox"/> Americas <input type="checkbox"/> Asia and Pacific <input type="checkbox"/> Europe <input type="checkbox"/> Middle East
Reference antisera	HI H1-H16	both	0	0	0	<input type="checkbox"/> Africa <input type="checkbox"/> Americas <input type="checkbox"/> Asia and Pacific <input type="checkbox"/> Europe <input type="checkbox"/> Middle East
AGID reagents	AGID	both	77892	6000	9	<input type="checkbox"/> Africa <input checked="" type="checkbox"/> Americas <input type="checkbox"/> Asia and Pacific <input type="checkbox"/> Europe <input type="checkbox"/> Middle East
Positive amplification controls	rRT-PCR (matrix, H5,H7)	both	1	0.5	3	<input type="checkbox"/> Africa <input checked="" type="checkbox"/> Americas <input type="checkbox"/> Asia and Pacific <input type="checkbox"/> Europe <input type="checkbox"/> Middle East
Positive extraction control	rRT-PCR	both	37	25	4	<input type="checkbox"/> Africa <input checked="" type="checkbox"/> Americas <input checked="" type="checkbox"/> Asia and Pacific <input type="checkbox"/> Europe <input type="checkbox"/> Middle East
Negative extraction control	rRT-PCR	both	64	35	4	<input type="checkbox"/> Africa <input checked="" type="checkbox"/> Americas <input checked="" type="checkbox"/> Asia and Pacific <input type="checkbox"/> Europe <input type="checkbox"/> Middle East

Proficiency test panels (avian and swine)	rRT-PCR	both	2820	0	1	<input type="checkbox"/> Africa <input checked="" type="checkbox"/> Americas <input type="checkbox"/> Asia and Pacific <input type="checkbox"/> Europe <input type="checkbox"/> Middle East
Proficiency test panels (12 samples 1 ml each)	AGID	both	435	15	4	<input type="checkbox"/> Africa <input checked="" type="checkbox"/> Americas <input checked="" type="checkbox"/> Asia and Pacific <input type="checkbox"/> Europe <input type="checkbox"/> Middle East

4. Did your laboratory produce vaccines?

No

5. Did your laboratory supply vaccines to OIE Member Countries?

No

***ToR 3: To develop, standardise and validate, according to OIE Standards, new procedures for diagnosis and control of the designated pathogens or diseases***

6. Did your laboratory develop new diagnostic methods validated according to OIE Standards for the designated pathogen or disease?

No

7. Did your laboratory develop new vaccines according to OIE Standards for the designated pathogen or disease?

No

***ToR 4: To provide diagnostic testing facilities, and, where appropriate, scientific and technical advice on disease control measures to OIE Member Countries***

8. Did your laboratory carry out diagnostic testing for other OIE Member Countries?

Yes

Name of OIE Member Country seeking assistance	Date (month)	No. samples received for provision of diagnostic support	No. samples received for provision of confirmatory diagnoses
CHILE	January	0	3

9. Did your laboratory provide expert advice in technical consultancies on the request of an OIE Member Country?

No

***ToR 5: To carry out and/or coordinate scientific and technical studies in collaboration with other laboratories, centres or organisations***

10. Did your laboratory participate in international scientific studies in collaboration with OIE Member Countries other than the own?

No

***ToR 6: To collect, process, analyse, publish and disseminate epizootiological data relevant to the designated pathogens or diseases***

11. Did your Laboratory collect epizootiological data relevant to international disease control?

Yes

If the answer is yes, please provide details of the data collected:
USDA-APHIS (2020). Epidemiologic and other analyses of avian influenza affected poultry flocks: July 21, 2020 Report. United States Department of Agriculture: Animal and Plant Health Inspection Service: Veterinary Services: Center for Epidemiology and Animal Health. Fort Collins, CO. pgs. 56

12. Did your laboratory disseminate epizootiological data that had been processed and analysed?

Yes

If the answer is yes, please provide details of the data collected:
USDA-APHIS (2020). Epidemiologic and other analyses of avian influenza affected poultry flocks: July 21, 2020 Report. United States Department of Agriculture: Animal and Plant Health Inspection Service: Veterinary Services: Center for Epidemiology and Animal Health. Fort Collins, CO. pgs. 56

**13. What method of dissemination of information is most often used by your laboratory?  
(Indicate in the appropriate box the number by category)**

a) Articles published in peer-reviewed journals: 2

Zhang X, Cunningham FL, Li L, Hanson-Dorr K, Liu L, Waters K, Guan M, Olivier A, Schmit BS, Nolting JM, Bowman AS, Torchetti MK, DeLiberto TJ, and Wan XF: Tissue tropisms of avian influenza A viruses affect their spillovers from wild bird to domestic swine. American Society of Virology conference doi: <https://doi.org/10.1101/2020.04.14.040964>

Crossley BM, Rejmanek D, Baroch J, Stanton JB, Young KT, Killian ML, Torchetti MK, Hietala SK: Nanopore sequencing as a rapid diagnostic tool for identification and pathotyping of avian influenza viruses. JVDI Manuscript accepted

Lee DH, Torchetti MK, Bahl J, Killian ML, Hicks J, Pantin-Jackwood M, Swayne: Transmission dynamics of Asian-origin H5 highly pathogenic avian influenza in United States. Oct 2018 EID

Youk S, Lee D, Killian ML, Pantin-Jackwood MJ, Swayne DE, Torchetti MK. Highly Pathogenic Avian Influenza A(H7N3) Virus in Poultry, United States, 2020. Emerg Infect Dis. 2020;26(12):2966-2969. <https://dx.doi.org/10.3201/eid2612.202790>

Bonney, P.J., Malladi, S., Ssematimba, A. et al. Estimating epidemiological parameters using diagnostic testing data from low pathogenicity avian influenza infected turkey houses. Sci Rep 11, 1602 (2021). <https://doi.org/10.1038/s41598-021-81254->

Agricultural and Geographic Factors Shaped the North American 2015 Highly Pathogenic Avian Influenza H5n2 Outbreak; Hicks, Joseph T., Dong-Hun Lee, Venkata R. Duvvuri, Mia Kim Torchetti, David E. Swayne, and Justin Bahl; 2020; <https://doi.org/10.1371/journal.ppat.1007857>

H7N1 Low Pathogenicity Avian Influenza Virus in Poultry, United States, 2018; Lee, Dong-hun, Mary Lea Killian, Thomas J. Deliberto, Xiu-Feng Wan, Li Lei, David E. Swayne, and Mia Kim Torchetti; 2020; <https://doi.org/10.1637/aviandiseases-D-20-00088>

b) International conferences: 4

c) National conferences: 1

February 2020: Live Bird Market Working Group Meeting

March 2020: National Poultry Improvement Plan (NPIP) workshop

August 2020: VIRTUAL American Veterinary Medical Association and American Association of Avian Practitioners Annual Meeting

October 2020: VIRTUAL United States Animal Health Association and American Association of Veterinary Laboratory Diagnosticians Annual Meeting

d) Other:

(Provide website address or link to appropriate information) 3

USDA-APHIS (2020). Epidemiologic and other analyses of avian influenza affected poultry flocks: July 21, 2020 Report. United States Department of Agriculture: Animal and Plant Health Inspection Service: Veterinary Services: Center for Epidemiology and Animal Health. Fort Collins, CO. pgs. 56

**ToR 7: To provide scientific and technical training for personnel from OIE Member Countries**

**To recommend the prescribed and alternative tests or vaccines as OIE Standards**

14. Did your laboratory provide scientific and technical training to laboratory personnel from other OIE Member Countries?

Yes

a) Technical visits: 1

b) Seminars: 0

c) Hands-on training courses: 0

d) Internships (>1 month): 0

Type of technical training provided (a, b, c or d)	Country of origin of the expert(s) provided with training	No. participants from the corresponding country
a: December 2020: VIRTUAL Assessment and Support of Molecular Diagnostic Testing for Avian Influenza and Newcastle Disease with the national reference laboratory in Chile (Servicio Agrícola y Ganadero, SAG - Agricultural and Livestock Service)	Chile	6

**ToR 8: To maintain a system of quality assurance, biosafety and biosecurity relevant for the pathogen and the disease concerned**

15. Does your laboratory have a Quality Management System?

Yes

Quality management system adopted	Certificate scan (PDF, JPG, PNG format)
ISO 17025 Biological Testing	2020 A2LA Accreditation Certificate.pdf

16. Is your quality management system accredited?

Yes

Test for which your laboratory is accredited	Accreditation body
AGID	American Association for Laboratory Accreditation (A2LA)
Hemagglutination-inhibition	A2LA
Neuraminidase-inhibition	A2LA
Real-Time RT-PCR tests	A2LA
Virus Isolation	A2LA
In vivo pathogenicity (IVPI)	A2LA

17. Does your laboratory maintain a “biorisk management system” for the pathogen and the disease concerned?

Yes

*(See Manual of Diagnostic Tests and Vaccines for Terrestrial Animals, Chapter 1.1.4)*

**ToR 9: To organise and participate in scientific meetings on behalf of the OIE**

18. Did your laboratory organise scientific meetings on behalf of the OIE?

No

19. Did your laboratory participate in scientific meetings on behalf of the OIE?

No

**ToR 10: To establish and maintain a network with other OIE Reference Laboratories designated for the same pathogen or disease and organise regular inter-laboratory proficiency testing to ensure comparability of results**

20. Did your laboratory exchange information with other OIE Reference Laboratories designated for the same pathogen or disease?

Yes

21. Was your laboratory involved in maintaining a network with OIE Reference Laboratories designated for the same pathogen or disease by organising or participating in proficiency tests?

No

22. Did your laboratory collaborate with other OIE Reference Laboratories for the same disease on scientific research projects for the diagnosis or control of the pathogen of interest?

Yes

Title of the project or contract	Scope	Name(s) of relevant OIE Reference Laboratories
Studies in Poultry Transmission, Airborne Spread and Mitigation Tools for Avian Influenza and Newcastle Disease in the USA	interagency agreement	USDA ARS National Poultry Center Southeast Poultry Research Laboratory
Antigenic and genetic characteristics of zoonotic influenza viruses and candidate vaccine viruses developed for potential use in human vaccines	Data contributions to OFFLU for the twice yearly WHO Vaccine Composition Consultations	OIE Reference Laboratories for Animal Influenza

**ToR 11: To organise inter-laboratory proficiency testing with laboratories other than OIE Reference Laboratories for the same pathogens and diseases to ensure**

**equivalence of results**

23. Did your laboratory organise or participate in inter-laboratory proficiency tests with laboratories other than OIE Reference Laboratories for the same disease?

Yes

Note: See Interlaboratory test comparisons in: *Laboratory Proficiency Testing* at: <http://www.oie.int/en/our-scientific-expertise/reference-laboratories/proficiency-testing> see point 1.3

Purpose for inter-laboratory test comparisons <sup>1</sup>	No. participating laboratories	Region(s) of participating OIE Member Countries
Administered by NVSL and required to conduct official testing in the U.S.; shipped internationally by request	59	<input type="checkbox"/> Africa <input checked="" type="checkbox"/> Americas <input type="checkbox"/> Asia and Pacific <input type="checkbox"/> Europe <input type="checkbox"/> Middle East

**ToR 12: To place expert consultants at the disposal of the OIE**

24. Did your laboratory place expert consultants at the disposal of the OIE?

No

25. Additional comments regarding your report:

The Diagnostic Virology Laboratory of the National Veterinary Services Laboratories is undergoing restructuring and will be identifying new subject matter experts. The COVID-19 pandemic has impacted national and international laboratory activities and sample receipt.

The IAV viruses isolated from U.S. poultry during 2020 were of North American wild bird lineage. H7N3 LPAI affected turkey farms along the border of North and South Carolina in the spring of 2020; a single mutation event led to HPAI in a single barn on a commercial turkey operation in South Carolina. Refer to USDA APHIS avian influenza page at <https://www.aphis.usda.gov/aphis/ourfocus/animalhealth/animal-disease-information/avian/avian-influenza/defend-the-flock-lpai-info>
