

Follow-up report No.2

Report reference: 14-015-00003., Reference OIE : 16708, Report Date : 09/12/2014, Country : Germany

Report Summary

Name of sender of the report	Dr. Karin Schwabenbauer	Telephone	+49-(0)228 - 99 529 - 4176
Position	Ministerial Dirigentin and Chief Veterinary Officer	Fax	+49-(0)228 - 99 529 - 3867
Address	Rochusstr. 1 Bonn D-53123	Email	ual33@bmelv.bund.de
		Date submitted to OIE	09/12/2014

Animal type	Terrestrial	Date of report	09/12/2014
Disease	Highly pathogenic avian influenza	Date of start of the event	04/11/2014
Causal Agent	Highly pathogenic avian influenza virus	Date of pre-confirmation of the event	05/11/2014
Serotype(s)	H5N8	Date of last occurrence	03/2009
Reason	Reoccurrence of a listed disease	Diagnosis	Clinical, Laboratory (basic), Laboratory (advanced)
Country or zone	a zone or compartment	Clinical signs	Yes
Number of reported outbreaks	submitted= 2, Draft= 0		

Outbreak details

Province	Number of outbreaks	District	Sub-district	Unit Type	Location	Latitude	Longitude	Start Date	End Date:
MECKLENBURG-VOR Pommern-other report - submitted	-	Vorpommern-Greifswald		Farm	Heinrichswalde	53.6163	13.784	04/11/2014	
Species	Measuring units	Susceptible	Cases	Deaths	Destroyed	Slaughtered			
Birds	Animals	30939	5000	1880	29059	0			
Affected Population	Fattening turkey holding								

Province	Number of outbreaks	District	Sub-district	Unit Type	Location	Latitude	Longitude	Start Date	End Date:
MECKLENBURG-VOR Pommern-other report - submitted	-			Not applicable	Isle of Rügen	54.46924	13.167629	17/11/2014	
Species	Measuring units	Susceptible	Cases	Deaths	Destroyed	Slaughtered			
Anatidae (unidentified):Anatidae(Anatidae (incognita))	Animals	...	1			
Affected Population									

Outbreak summary: Total outbreaks = 2 (Submitted)

Species	Susceptible	Cases	Deaths	Destroyed	Slaughtered
Birds	30939	5000	1880	29059	0
Anatidae (unidentified)		1			

Epidemiology

Epidemiological comments

All poultry have been culled and safely disposed of. Cleaning and disinfection have been completed on 10 November 2014. All samples taken from poultry of holdings in the restricted zones and of contact holdings have been investigated with negative results for avian influenza virus.

The active monitoring of wild birds showed negative results for avian influenza virus with the exception of a clinically healthy wild duck shot on 17 November 2014 on the Isle of Rügen (approximately 100 km distance to the affected location); the same virus type as the affected poultry has been demonstrated. Please note that the virus findings (poultry, wild duck) are both isolate outbreaks in Mecklenburg-Western Pomerania only.

Source of the outbreak(s) or origin of infection

• Unknown or inconclusive

Measures applied

Applied	To be applied

Applied	To be applied
<ul style="list-style-type: none"> • control of wildlife reservoirs • stamping out • movement control inside the country • screening • zoning • disinfection of infected premises/establishment(s) 	<ul style="list-style-type: none"> • no planned control measures
Animals treated	Vaccination Prohibited
No	Yes

Future Reporting

The event is continuing. Weekly follow-up reports will be submitted.
