### Report Summary

**Name of sender of the report:** Dr Loïc Evain  
**Position:** Directeur Général adjoint, CVO  
**Address:** 251, rue de Vaugirard, 75732 PARIS Cedex 15 Paris  
**Telephone:** (33) 1 49 55 81 77  
**Fax:** (33) 1 49 55 55 91  
**Email:** loic.evain@agriculture.gouv.fr  
**Date submitted to OIE:** 09/08/2016  

**Animal type:** Terrestrial  
**Date of report:** 09/08/2016  
**Disease:** Highly pathogenic avian influenza  
**Date of start of the event:** 27/11/2015  
**Causal Agent:** Highly pathogenic avian influenza virus  
**Date of confirmation of the event:** 30/11/2015  
**Serotype(s):** H5N2  
**Reason:** New strain of a listed disease in the country  
**Clinical signs:** No  

**Country or zone:** a zone or compartment  
**Number of reported outbreaks:** submitted = 36, Draft = 0

### Outbreak details

#### DORDOGNE-other report - submitted

<table>

Follow-up report No.: 12, Report reference: H5N2_1, OIE Ref: 20717, Report Date: 09/08/2016, Country: France
Affected Population: Samples were taken in the framework of analytical surveillance in a batch of gavaged ducks. The National Reference Laboratory confirmed the presence of a highly pathogenic H5 virus, N absent, on 22 December 2015.

**Species**
- Measuring units: Animals
- Susceptible: 5206
- Cases: 350
- Deaths: 350
- Destroyed: 4856
- Slaughtered: 0

Affected Population: Mortality in a holding affecting 350 guinea fowls out of a total of 5,200 (6 geese also present in the farm) lead to samples being taken for clinical suspicion. All animals were destroyed.

**Species**
- Measuring units: Animals
- Susceptible: 890
- Cases: ...
- Deaths: 0
- Destroyed: 890
- Slaughtered: 0

Affected Population: Samples were taken in the framework of analytical surveillance. The 380 ducks in the end of the gavage process were destroyed on 18 December 2015 and destruction of the other 510 additional ducks took place on 22 December 2015.

**Species**
- Measuring units: Animals
- Susceptible: 6000
- Cases: ...
- Deaths: 0
- Destroyed: 0
- Slaughtered: 0

Affected Population: Samples were taken in the framework of analytical surveillance. Highly pathogenic H5 virus was identified, the N has not been typed yet.

**Species**
- Measuring units: Animals
- Susceptible: 1400
- Cases: ...
- Deaths: 0
- Destroyed: 1400
- Slaughtered: 0

Affected Population: Samples were taken in the framework of analytical surveillance. The National Reference laboratory confirmed a highly pathogenic H5 virus, but as of today the N has not been typed yet.

**Species**
- Measuring units: Animals
- Susceptible: 980
- Cases: ...
- Deaths: 0
- Destroyed: 980
- Slaughtered: 0

Affected Population: Duck gavage unit. Samples were taken in the framework of the analytical surveillance.

Follow-up report No.: 12, Report reference: H5N2_1, OIE Ref: 20717, Report Date: 09/08/2016, Country: France
A duck gavage unit. Samples were taken in the frame of the analytical surveillance. The National Reference laboratory confirmed a highly pathogenic H5 virus, but as of today the N is unknown.

**LANDES-other report - submitted**

- **Species**: Birds
  - **Measuring units**: Animals
  - **Susceptible**: 3600
  - **Cases**: ...
  - **Deaths**: ...
  - **Destroyed**: ...
  - **Slaughtered**: ...

Affected Population: As part of the epidemiological investigation on the highly pathogenic H5 outbreak in Vaureilles, the National Reference Laboratory confirmed on 5 August 2016 the presence of an H5 virus, N absent, highly pathogenic on a farm of 11,000 ducks ready for gavage. No animal showed clinical signs.

Outbreak summary: Total outbreaks = 36 (Submitted)

### Epidemiology

#### Epidemiological comments

- Zoning: protection zone (3 km) and surveillance zone (10 km) around the farms as well as an additional low-risk zoning.
- Source of the outbreak(s) or origin of infection
  - Introduction of new live animals

#### Measures applied

| Applied | To be applied |
**Applied**
- stamping out
- movement control inside the country
- screening
- zoning
- disinfection / disinfestation
- surveillance outside containment and/or protection zone
- official disposal of carcasses, by-products and waste
- surveillance within containment and/or protection zone
- traceability

**To be applied**
- control of wildlife reservoirs

**Animals treated**
- Vaccination Prohibited
  - No
  - Yes

**Diagnostic test results**
