---|---|---|---|---|---
Birds | 285 | 200 | 144 | 141 | 0

Epidemiology

Epidemiological comments:
Outbreak resolved on 28 December 2016 by culling and disinfection procedures. Active surveillance was carried out according to the OIE Terrestrial Code in the whole country by targeting commercial poultry farms, backyard poultry and birds. No new cases were detected and three months have elapsed after the end of the outbreak, culling and disinfection procedures included. Therefore, by complying with the OIE Terrestrial code chapter 10.4, article 3, the State of Kuwait self-declares free from HPAI, with effect from 28 March 2017 by continuing surveillance.

Source of the outbreak(s) or origin of infection:
• Unknown or inconclusive

Measures applied

| Applied | To be applied |
---|---|
• movement control inside the country | • no planned control measures
• screening | |
• disinfection / disinestation | |
