Affected Population	Poultry (broilers)								

Outbreak summary: Total outbreaks = 1 (Submitted)

Species	Susceptible	Cases	Deaths	Killed and disposed of	Slaughtered
Birds	51000	55	55	50945	0

Epidemiology

Epidemiological comments

There has been no new outbreak since previous report, but this report informs about the completion of control measures taken under Japan's control policy.

Follow up information of previous report;
On 12th January, destruction of all the susceptible birds and disinfection in the affected farm and an epidemiologically linked farm have been completed.

Therefore, all control measures for the affected farm and an epidemiologically linked farm were completed.

Active surveillance on all poultry farms within a three-kilometer radius of the affected farm was carried out and all of the antigen tests, antibody tests and virus isolation tests resulted negative.

Source of the outbreak(s) or origin of infection

• Unknown or inconclusive

Measures applied

Applied	To be applied
<ul style="list-style-type: none"> • movement control inside the country • screening • quarantine • stamping out • disinfection 	<ul style="list-style-type: none"> • no planned control measures
