

Follow-up report No.1

Report reference: , Reference OIE : 26286, Report Date : 26/03/2018, Country : Denmark

Report Summary

Name of sender of the report	Dr Per Starcke Henriksen	Telephone	+45 72 27 69 00
Position	Chief Veterinary Officer	Fax	
Address	Stationsparken 31-33 Glostrup DK-2600	Email	pesh@fvst.dk
		Date submitted to OIE	26/03/2018

Animal type	Terrestrial	Date of report	26/03/2018
Disease	Highly pathogenic influenza A viruses (infection with) (non-poultry including wild birds)	Date of start of the event	13/02/2018
Causal Agent	Highly pathogenic influenza A virus	Date of confirmation of the event	01/03/2018
Serotype(s)	H5N6	Date of last occurrence	19/04/2017
Reason	Recurrence of a listed disease	Diagnosis	Laboratory (advanced)
Country or zone	the whole country	Clinical signs	Yes
Number of reported outbreaks	submitted= 5, Draft= 0		

Outbreak details

Regional Veterinary and Food Administration	Number of outbreaks	Municipality		Unit Type	Location	Latitude	Longitude	Start Date	End Date:
East-other report - submitted	-	Slagelse		Forest	Valbygård skov	55.3932	11.443	13/02/2018	01/03/2018
Species	Measuring units	Susceptible	Cases	Deaths	Killed and disposed of	Slaughtered			
White-tailed Eagle:Accipitridae(Haliaeetus albicilla)	Animals	...	1	1	0	0			
Affected Population	On February 13th, a white-tailed eagle (Haliaeetus albicilla) was found dead in a forest near Slagelse. On March 1st, the national veterinary institute confirmed the presence of highly pathogenic influenza A virus (H5N6) in the samples from the eagle.								

Regional Veterinary and Food Administration	Number of outbreaks	Municipality		Unit Type	Location	Latitude	Longitude	Start Date	End Date:
East- (this report - submitted)	-	Naestved		Forest	Vejloe Skov	55.1611	11.7259	13/02/2018	23/03/2018
Species	Measuring units	Susceptible	Cases	Deaths	Killed and disposed of	Slaughtered			
White-tailed Eagle:Accipitridae(Haliaeetus albicilla)	Animals	...	1	1	0	0			
Affected Population	On February 13th, a white-tailed eagle (Haliaeetus albicilla) was found dead in a forest near Naestved. On March 23rd, the National Veterinary Institute confirmed the presence of highly pathogenic avian influenza virus (H5N6) in the samples from the eagle.								

Regional Veterinary and Food Administration	Number of outbreaks	Municipality		Unit Type	Location	Latitude	Longitude	Start Date	End Date:
West- (this report - submitted)	-	Thisted		Not applicable	Hurup	56.695	8.4676	10/03/2018	23/03/2018
Species	Measuring units	Susceptible	Cases	Deaths	Killed and disposed of	Slaughtered			
White-tailed Eagle:Accipitridae(Haliaeetus albicilla)	Animals	...	1	1	0	0			
Affected Population	On March 10th, a white-tailed eagle (Haliaeetus albicilla) was found dead in a natural site near Thisted. On March 23rd, the National Veterinary Institute confirmed the presence of highly pathogenic avian influenza virus (H5N6) in the samples from the eagle.								

Species	Measuring units	Susceptible	Cases	Deaths	Killed and disposed of	Slaughtered			
Regional Veterinary and Food Administration	Number of outbreaks	Municipality		Unit Type	Location	Latitude	Longitude	Start Date	End Date:
West- (this report - submitted)	-	Thisted		Forest	Hjardemål Plantage	57.0943	8.8397	14/03/2018	23/03/2018
Species	Measuring units	Susceptible	Cases	Deaths	Killed and disposed of	Slaughtered			
White-tailed Eagle:Accipitridae(Haliaeetus albicilla)	Animals	...	1	1	0	0			
Affected Population	On March 14th, a white-tailed eagle (Haliaeetus albicilla) was found dead in a plantation near Thisted. On March 23rd, the National Veterinary Institute confirmed the presence of highly pathogenic avian influenza virus (H5N6) in the samples from the eagle.								

Regional Veterinary and Food Administration	Number of outbreaks	Municipality		Unit Type	Location	Latitude	Longitude	Start Date	End Date:
East- (this report - submitted)	-			Forest	Maribo	54.7381	11.5408	16/03/2018	23/03/2018
Species	Measuring units	Susceptible	Cases	Deaths	Killed and disposed of	Slaughtered			
White-tailed Eagle:Accipitridae(Haliaeetus albicilla)	Animals	...	1	1	0	0			
Affected Population	On March 16th, a white-tailed eagle (Haliaeetus albicilla) was found dead near a forest on the island of Lolland. On March 23rd, the National Veterinary Institute confirmed the presence of highly pathogenic avian influenza virus (H5N6) in the samples from the eagle.								

Outbreak summary: Total outbreaks = 5 (Submitted)

Species	Susceptible	Cases	Deaths	Killed and disposed of	Slaughtered
White-tailed Eagle		5	5	0	0

Epidemiology

Epidemiological comments

According to article 10.4.1.8 of the Terrestrial Animal Health Code, Member Countries should not impose bans on the trade in poultry commodities in response to notification of the presence of any influenza A virus in birds other than poultry.

Source of the outbreak(s) or origin of infection

- Contact with wild species

Measures applied

No Control Measures

Animals treated

No

Vaccination Prohibited

Yes

Diagnostic test results

Laboratory Type	Name of Laboratory	Species	Test Type	Date results provided	Result
National laboratory	National Veterinary Institute	White-tailed Eagle	reverse transcription - polymerase chain reaction (RT-PCR)	23/03/2018	Positive

Future Reporting

The event is continuing. Weekly follow-up reports will be submitted.
