

Follow-up report No.2

Report reference: , Reference OIE : 27906, Report Date : 11/09/2018, Country : Denmark

Report Summary

Name of sender of the report	Mr Torben Grubbe	Telephone	(+45) 7227 6539
Position	Specialist consultant	Fax	
Address	Stationsparken 31-33 Glostrup DK-2600	Email	tgr@fvst.dk
		Date submitted to OIE	11/09/2018

Animal type	Terrestrial	Date of report	11/09/2018
Disease	Highly pathogenic influenza A viruses (infection with) (non-poultry including wild birds)	Date of start of the event	08/07/2018
Causal Agent	Highly pathogenic influenza A virus	Date of confirmation of the event	16/07/2018
Serotype(s)	H5N6	Date of last occurrence	15/04/2018
Reason	Recurrence of a listed disease	Diagnosis	Clinical, Laboratory (advanced)
Country or zone	the whole country	Clinical signs	Yes
Number of reported outbreaks	submitted= 4, Draft= 0		

Outbreak details

Regional Veterinary and Food Administration	Number of outbreaks	Municipality		Unit Type	Location	Latitude	Longitude	Start Date	End Date:
East-other report - submitted	-	Lolland		Not applicable	Vejrø	55.0232	11.3458	08/07/2018	08/07/2018
Species	Measuring units	Susceptible	Cases	Deaths	Killed and disposed of	Slaughtered			
Common Eider:Anatidae(Somateria mollissima)	Animals	...	1	1	0	0			
Affected Population	On 8th July, a common eider (Somateria mollissima) was found dead on the island of Vejrø, municipality of Lolland. The bird was found among several other dead wild birds of different species, but mostly eiders. On July 16th, the National Veterinary Institute confirmed highly pathogenic influenza A virus (H5N6) in the samples from one eider; the other birds were unsuitable for testing.								

Regional Veterinary and Food Administration	Number of outbreaks	Municipality		Unit Type	Location	Latitude	Longitude	Start Date	End Date:
East-other report - submitted	-	Slagelse		Not applicable	Korsør	55.3173	11.157	09/08/2018	09/08/2018
