Epidemiology

Epidemiological comments

According to article 10.4.1.8 of the Terrestrial Animal Health Code, Member Countries should not impose bans on the trade in poultry and poultry commodities in response to notification on the presence of any influenza A virus in birds other than poultry. No additional cases of infection with highly pathogenic influenza A viruses has been detected since it was detected in the common buzzard found dead in Rørvig on 4 January 2019.

Source of the outbreak(s) or origin of infection

- Contact with wild species

Measures applied

No Control Measures	
Animals treated	Vaccination Prohibited
No	Yes

Future Reporting

The event is continuing. Weekly follow-up reports will be submitted.
