

Follow-up report No.11

Report reference: , Reference OIE : 34056, Report Date : 20/04/2020, Country : United States of America

Report Summary

Name of sender of the report	Dr Mark Davidson	Telephone	+1 202-799-7000
Position	Associate Administrator	Fax	+1 202 720 3054
Address	1400 Independence Avenue, SW J.L. Whitten Building, Room 307-E, Washington DC 20250	Email	Mark.L.Davidson@usda.gov
		Date submitted to OIE	22/04/2020

Animal type	Terrestrial	Date of report	20/04/2020
Disease	Rabbit haemorrhagic disease	Date of start of the event	08/07/2019
Causal Agent	Rabbit haemorrhagic disease virus	Date of confirmation of the event	17/07/2019
Serotype(s)	RHDV2	Date of last occurrence	16/04/2019
Reason	Recurrence of a listed disease	Diagnosis	Laboratory (advanced)
Country or zone	a zone or compartment	Clinical signs	Yes
Number of reported outbreaks	submitted= 40, Draft= 0		

Outbreak details

State	Number of outbreaks	County		Unit Type	Location	Latitude	Longitude	Start Date	End Date:
Washington-other report - submitted	-	San Juan		Backyard	San Juan County	48.5445	-122.994	08/07/2019	17/09/2019

Black-tailed Jackrabbit		6	6		0
Desert Cottontail		19	19		0
Eastern Cottontail		3	3		0

Epidemiology

Epidemiological comments

Epidemiological comments**Source of the outbreak(s) or origin of infection**

- Unknown or inconclusive

Update Apr 20, 2020:

Colorado--RHDV2 confirmed in three wild Eastern cottontail rabbits (*Sylvilagus floridanus*) in Costilla County, Colorado on 17 Apr 2020. This is the first detection of RHDV2 in Colorado.

Colorado State Animal Health Officials and the United States Department of Agriculture (USDA), Animal and Plant Health Inspection Services (APHIS) have begun an epidemiological investigation into the outbreak.

Arizona--RHDV2 confirmed in domestic rabbits (*Oryctolagus cuniculus*) on one additional non-commercial premises in Cochise County, Arizona. Total positive premises in Arizona is two. All affected premises have been quarantined. Depopulation and disposal activities are pending.

There have also been three new wild rabbit detections of RHDV2 in Desert cottontail rabbits (*Sylvilagus audubonii*) from Cochise County and a Black-tailed jackrabbit (*Lepus californicus*) from Greenlee County.

Arizona State Animal Health Officials and the USDA, APHIS continue an epidemiological investigation into these outbreaks.

Texas--RHDV2 confirmed in domestic rabbits (*Oryctolagus cuniculus*) on two additional non-commercial premises in El Paso County, Texas. Total positive premises in Texas is three. RHDV2 has also been detected in wild Black-tailed jackrabbits (*Lepus californicus*) in Lubbock County and Desert cottontail rabbits (*Sylvilagus audubonii*) in Hudspeth County. Disease response activities are pending.

Texas State Animal Health Officials and the USDA, APHIS continue an epidemiological investigation into the outbreaks.

New Mexico--RHDV2 confirmed in domestic rabbits (*Oryctolagus cuniculus*) from four additional non-commercial premises. Total positive premises in New Mexico is 17, in addition to wild rabbit detections. State officials have quarantined all affected premises. Depopulation activities have been completed on ten of the premises. Disposal (incineration recommended) is ongoing.

New Mexico State Animal Health Officials and the USDA, APHIS continue their epidemiological investigation into these outbreaks.

General clinical signs seen in confirmed cases from all the affected states include lethargy, seizures, and sudden death.

Currently, there are no known links to outbreak events in Washington or New York.

Source of the outbreak(s) or origin of infection

- Unknown or inconclusive

Measures applied

Applied	To be applied
<ul style="list-style-type: none"> • surveillance within containment and/or protection zone • traceability • quarantine • disinfection 	<ul style="list-style-type: none"> • no planned control measures
Animals treated	Vaccination Prohibited
No	Yes

Diagnostic test results

Laboratory Type	Name of Laboratory	Species	Test Type	Date results provided	Result
National laboratory	National Veterinary Services Laboratories	Eastern Cottontail	antigen (Ag) detection ELISA	17/04/2020	Positive
National laboratory	National Veterinary Services Laboratories	Eastern Cottontail	reverse transcription - polymerase chain reaction (RT-PCR)	17/04/2020	Positive
National laboratory	National Veterinary Services Laboratories	Black-tailed Jackrabbit	reverse transcription - polymerase chain reaction (RT-PCR)	17/04/2020	Positive
National laboratory	National Veterinary Services Laboratories	Desert Cottontail	reverse transcription - polymerase chain reaction (RT-PCR)	17/04/2020	Positive
National laboratory	National Veterinary Services Laboratories	Rabbits	reverse transcription - polymerase chain reaction (RT-PCR)	17/04/2020	Positive
National laboratory	National Veterinary Services Laboratories	Black-tailed Jackrabbit	reverse transcription - polymerase chain reaction (RT-PCR)	15/04/2020	Positive

Laboratory Type	Name of Laboratory	Species	Test Type	Date results provided	Result
National laboratory	National Veterinary Services Laboratories	Rabbits	reverse transcription - polymerase chain reaction (RT-PCR)	15/04/2020	Positive
National laboratory	National Veterinary Services Laboratories	Rabbits	antigen (Ag) detection ELISA	14/04/2020	Positive
National laboratory	National Veterinary Services Laboratories	Rabbits	reverse transcription - polymerase chain reaction (RT-PCR)	14/04/2020	Positive

Future Reporting

The event is continuing. Weekly follow-up reports will be submitted.
