### Animal type
- **Terrestrial**

### Disease
- **Highly pathogenic avian influenza**

### Causal Agent
- **Highly pathogenic avian influenza virus**

### Serotype(s)
- H5

### Reason
- First occurrence of a listed disease in the country

### Country or zone
- a zone or compartment

### Number of reported outbreaks
- submitted= 1, Draft= 0

#### Affected Population

### Epidemiology

#### Epidemiological comments
There are still continuous deaths of wild ducks and birds along the shores and islands of Lake Victoria in Masaka and Wakiso districts. In Masaka alone, wild and domestic birds are dying at alarming numbers and in Lutembe wetland white-winged terns are the ones dying. This is already a big threat to over thirty million domestic poultry in Uganda which calls for an urgent response to control the spread of the disease from wild birds to domestic birds.

**Source of the outbreak(s) or origin of infection**
- Contact with wild species

### Measures applied
